1 General Places application description

iPhone, iPad and iPod touch compatible

Task:

Places is an iOS application. Places lets you store, share and easily navigate to your favorite locations on Earth.

You will be able to:

1. Save your current location as Place for further usage
2. Navigate to saved Places
3. Share your current location or other Place with others
4. Name your Places
5. Identify Place with unique image
6. Manage your Places

2 Saving current location

To save current location for further usage tap `Save` button on the bottom of the screen.
